Annual Index
Westinghouse ENGINEER
Volume 27, 1967

Subject Index

(PI . . . Products for Industry; TP . . . Technology in Progress)

A

Airport. See Transportation.
Aluminum. See Power supply.
Amplifier, digital modulation for solid-state linear. M. L. Jones and J. R. Colgan. Sept 1967. p134–8.
Annealing. See Steel mill.
Arc welding. See Welding.
Atomic energy. See Nuclear energy.

C

Cachalot diving system. See Marine.
Capacitor
series, for EHV transmission lines. W. H. Cuttino, J. E. O'Neil, and A. B. Pyle. Jan 1967. p12–7.
synthetic-film. PI. Sept 1967. p159.
See also Motor.
Circuit breaker. See Relay; Switch.
Communications
solid-state equipment improves mission reliability. N. B. Tharp. Sept 1967. p130–4.
See also Amplifier; Transmitter.
Computer
data tape translator. PI. Sept 1967. p159.
electrical machines improved through a decade of design progress. H. M. Chen, F. R. Karr, and F. A. List. July 1967. p105–10.
industrial plant power problems solved by simulation. TP. Mar 1967. p62.
See also Condenser; Steel mill.
Condenser, automating the design and manufacture of surface condensers. E. J. Barsness, J. McLean, and A. R. Geesaman. July 1967. p111–5.
Continuous casting. See Wire.
Control
high-voltage motor starters fit the application. TP. Jan 1967. p29.
operator unit. PI. Mar 1967. p64.
progressive draw control coordinates sectional speed changes. W. H. Watson. Jan 1967. p26–8.
thyristor for fractional-horsepower dc motors. PI. July 1967. p128.
See also Furnace control; Steel mill; Transportation.
Copper. See Wire.

D

Data logging. See Telemetering.
Deepstar. See Marine.
Diode, sensitive fire detector can be used at high temperatures. TP. Sept 1967. p157.
Drive. See Steel mill.

E

Education, portable audio-visual center for instruction. TP. Mar 1967. p62.
EHV. See Capacitor.
Electric heating, residential—a desirable load for electric utilities. R. F. Cook. Nov 1967. p170–4.
Electric stairway, Los Angeles Merchandise Mart. Jan 1967. Inside front cover.
Electric utility. See Capacitor; Electric heating; Power system; Telemetering.
Electric vehicles, Marketeer I. May 1967. Inside front cover.
Engineering
individual leadership. L. A. Kilgore. Mar 1967. p58–60.
mathematical decision-making process. M. J. Gelpi. Jan 1967. p24–5.

F

Fire detector. See Diode.
Flash evaporator
desalting plant relieves Key West water shortage. TP. Sept 1967. p159.
U.S. Steel Clairton Works. TP. Mar 1967. p61.
See also Water purification.
Fuel cell. See Furnace control; Oxygen analyzer.
Furnace control, combustion control with fuel-cell sensor. W. M. Hickam and J. F. Zamaria. July 1967. p122–4.

G

Generator. See Computer.

H

Heating. See Electric heating; Induction heating.

I

Induction heating
impeller hubs for torque converters induction-hardened in high-volume facility. TP. July 1967. p126.
speeds hot-spinning process. TP. May 1967. p93.
Insulation, varnish for class F and H electrical systems. PI. July 1967. p128.
Integrated circuits, spreading resistance probe. July 1967. Back cover.

L

Lamp. See Lighting.
Laser, light modulator. Sept 1967. Inside front cover.
Lighting
high-frequency fluorescent lighting for rapid-transit service. T. D. Sanders. Jan 1967. p20–3.
Peachtree Center office tower. Mar 1967. Inside front cover.
Lunar. See Moon.

M

Marine
Arctic research drift vessel. TP. May 1967. p93.
manned underwater station. TP. Sept 1967. p157.
offshore oil platform salvaged with Cachalot diving system. Jan 1967. p18–9.
second Deepstar deep-diving vehicle under construction. TP. May 1967. p94.
Marketeer. See Electric vehicle.
Meter, versatile phase-angle for electric power system analysis. T. L. Bourbonnais II and L. J. Lunas. May 1967. p88–92.
Moon
fluorescent meteorites on the moon. TP. Jan 1967. p31.
scientific station study. V. B. Morris, E. J. Sternglass, and R. D. Shelton. May 1967. p66–72.
Motor
capacitors and induction motors . . . the factors in trouble-free application. R. J. Alke. Nov 1967. p167–9.
fractional-horsepower induction motors . . . versatile power sources. T. E. M. Carville. Nov 1967. p175–83.
PAM induction motors—two speeds with one winding. R. C. Robinson. Sept 1967. p149–51.
PAM two-speed. PI. Mar 1967. p64.
permanent-magnet. PI. Sept 1967. p160.
rapid repair process. PI. Sept 1967. p160.
See also Computer; Control; Power supply.

N

Nuclear energy
breeder power reactor plans being developed. TP. July 1967. p126.
containment design lowers nuclear plant capital costs. May 1967. p82–3.
core support plate for pressurized-water reactor. May 1967. Back cover.
reactor coolant pumps grow with plant sizes. TP. Mar 1967. p61.

Annual Index
Westinghouse ENGINEER
Volume 27, 1967

Subject Index

(PI . . . Products for Industry; TP . . . Technology in Progress)

A

Airport. See Transportation.
Aluminum. See Power supply.
Amplifier, digital modulation for solid-state linear. M. L. Jones and J. R. Colgan. Sept 1967. p134–8.
Annealing. See Steel mill.
Arc welding. See Welding.
Atomic energy. See Nuclear energy.

C

Cachalot diving system. See Marine.
Capacitor
series, for EHV transmission lines. W. H. Cuttino, J. E. O'Neil, and A. B. Pyle. Jan 1967. p12–7.
synthetic-film. PI. Sept 1967. p159.
See also Motor.
Circuit breaker. See Relay; Switch.
Communications
solid-state equipment improves mission reliability. N. B. Tharp. Sept 1967. p130–4.
See also Amplifier; Transmitter.
Computer
data tape translator. PI. Sept 1967. p159.
electrical machines improved through a decade of design progress. H. M. Chen, F. R. Karr, and F. A. List. July 1967. p105–10.
industrial plant power problems solved by simulation. TP. Mar 1967. p62.
See also Condenser; Steel mill.
Condenser, automating the design and manufacture of surface condensers. E. J. Barsness, J. McLean, and A. R. Geesaman. July 1967. p111–5.
Continuous casting. See Wire.
Control
high-voltage motor starters fit the application. TP. Jan 1967. p29.
operator unit. PI. Mar 1967. p64.
progressive draw control coordinates sectional speed changes. W. H. Watson. Jan 1967. p26–8.
thyristor for fractional-horsepower dc motors. PI. July 1967. p128.
See also Furnace control; Steel mill; Transportation.
Copper. See Wire.

D

Data logging. See Telemetering.
Deepstar. See Marine.
Diode, sensitive fire detector can be used at high temperatures. TP. Sept 1967. p157.
Drive. See Steel mill.

E

Education, portable audio-visual center for instruction. TP. Mar 1967. p62.
EHV. See Capacitor.
Electric heating, residential—a desirable load for electric utilities. R. F. Cook. Nov 1967. p170–4.
Electric stairway, Los Angeles Merchandise Mart. Jan 1967. Inside front cover.
Electric utility. See Capacitor; Electric heating; Power system; Telemetering.
Electric vehicles, Marketeer I. May 1967. Inside front cover.
Engineering
individual leadership. L. A. Kilgore. Mar 1967. p58–60.
mathematical decision-making process. M. J. Gelpi. Jan 1967. p24–5.

F

Fire detector. See Diode.
Flash evaporator
desalting plant relieves Key West water shortage. TP. Sept 1967. p159.
U.S. Steel Clairton Works. TP. Mar 1967. p61.
See also Water purification.
Fuel cell. See Furnace control; Oxygen analyzer.
Furnace control, combustion control with fuel-cell sensor. W. M. Hickam and J. F. Zamaria. July 1967. p122–4.

G

Generator. See Computer.

H

Heating. See Electric heating; Induction heating.

I

Induction heating
impeller hubs for torque converters induction-hardened in high-volume facility. TP. July 1967. p126.
speeds hot-spinning process. TP. May 1967. p93.
Insulation, varnish for class F and H electrical systems. PI. July 1967. p128.
Integrated circuits, spreading resistance probe. July 1967. Back cover.

L

Lamp. See Lighting.
Laser, light modulator. Sept 1967. Inside front cover.
Lighting
high-frequency fluorescent lighting for rapid-transit service. T. D. Sanders. Jan 1967. p20–3.
Peachtree Center office tower. Mar 1967. Inside front cover.
Lunar. See Moon.

M

Marine
Arctic research drift vessel. TP. May 1967. p93.
manned underwater station. TP. Sept 1967. p157.
offshore oil platform salvaged with Cachalot diving system. Jan 1967. p18–9.
second Deepstar deep-diving vehicle under construction. TP. May 1967. p94.
Marketeer. See Electric vehicle.
Meter, versatile phase-angle for electric power system analysis. T. L. Bourbonnais II and L. J. Lunas. May 1967. p88–92.
Moon
fluorescent meteorites on the moon. TP. Jan 1967. p31.
scientific station study. V. B. Morris, E. J. Sternglass, and R. D. Shelton. May 1967. p66–72.
Motor
capacitors and induction motors . . . the factors in trouble-free application. R. J. Alke. Nov 1967. p167–9.
fractional-horsepower induction motors . . . versatile power sources. T. E. M. Carville. Nov 1967. p175–83.
PAM induction motors—two speeds with one winding. R. C. Robinson. Sept 1967. p149–51.
PAM two-speed. PI. Mar 1967. p64.
permanent-magnet. PI. Sept 1967. p160.
rapid repair process. PI. Sept 1967. p160.
See also Computer; Control; Power supply.

N

Nuclear energy
breeder power reactor plans being developed. TP. July 1967. p126.
containment design lowers nuclear plant capital costs. May 1967. p82–3.
core support plate for pressurized-water reactor. May 1967. Back cover.
reactor coolant pumps grow with plant sizes. TP. Mar 1967. p61.

Nuclear energy (*continued*)
reactor design checked with scale models. TP. July 1967. p125.

O

Oxygen analyzer, fuel-cell sensing. PI. Jan 1967. p32.

P

Peaking plant. See Power system.
Plastic, high-temperature plastics for structures and adhesives. TP. Jan 1967. p29.
Power plant. See Furnace control; Nuclear energy; Turbine, steam.
Power supply
aluminum hot-rolling line has thyristor power system. A. M. Curry and Warren Reid. Mar 1967. p48–51.
dc motor and thyristor power supply. V. E. Vrana. July 1967. p98–104.
silicon rectifiers cut costs of arc-air gouging. TP. May 1967. p93.
system provides precise uninterruptible ac power for critical data-handling equipment. R. P. Bleikamp and G. K. Glover. Mar 1967. p52–7.
Power system
peaking plants can provide system cost reductions. M. J. Boho. Nov 1967. p162–6.
See also Electric heating; Meter.
Pump. See Nuclear energy.

R

Radar
mapping for geoscience research. TP. July 1967. p127.
missile research system. TP. Jan 1967. p 30.
Radio. See Amplifier; Communications; Transmitter.
Railway. See Lighting.
Rapid transit. See Transportation.
Receiver. See Communications.
Rectifier
compression bonding produces high-voltage, high-current. R. R. Shaw, J. R. Shiring, and K. S. Tarneja. Sept 1967. p152–6.
silicon. PI. May 1967. p96.
Relay, circuit-breaker reclosure. PI. Sept 1967. p160.

S

Satellite, environmental experiment package (EME) for ATS. L. W. Rustad. July 1967. p116–21.
Silicon switch. See Switch.
Steam turbine. See Turbine, steam.
Steel mill
batch annealing of steel strip. F. A. Woodbury. Nov 1967. p184–5.
cold-rolling mills maximize return on investment. D. R. DeYoung and T. J. Dolphin. Jan 1967. p6–11.
dynamic control improves BOF steelmaking process. N. R. Carlson and L. F. Martz. Sept 1967. p142–8.
electrical systems for hot-rolling mills . . . faster, more powerful, more capable. E. H. Browning. May 1967. p84–7.
hot strip mill produces quality and quantity. TP. Mar 1967. p62; Back cover.
Switch
silicon, light-activated for high-power switching. TP. Jan 1967. p31; Back cover.
underground load-break. PI. Sept 1967. p159.
vacuum circuit interrupter. PI. July 1967. p128.

T

Telemetering, digital system for data logging. G. B. Higgins. Jan 1967. p2–5.
Thyristor
high-power water cooled. PI. July 1967. p128.
See also Power supply; Transmitter.
Train control. See Transportation.
Transformer
explosion-proof. PI. May 1967. p96.
machine-tool control. PI. Mar 1967. p64.
distribution
aluminizing extends lifetime of transformer tanks. TP. July 1967. p126.
power
new designs and techniques. W. T. Duboc. Mar 1967. p34–40.
pad-mount power center. PI. Jan 1967. p32.
Transistor, thin-film method makes high-frequency transistors. TP. Jan 1967. p29.
Transmission line
underground transmission studied in major test project. TP. Sept 1967. p157.
See also Capacitor.
Transmitter
thyristors provide high-power r-f generation for VLF/LF transmitter. G. R. Brainerd. Sept 1967. p138–41.
See also Amplifier; Communications.
Transportation
airport system for passenger transfer. TP. May 1967. p94.
automatic train control system will serve Bay Area transit. TP. July 1967. p125.
See also Lighting.
Tube, electronic, image intensifier. PI. July 1967. p128.
Turbine, steam
auxiliary drives. Mario Pierpoline. Mar 1967. p41–7.
stocking and ordering of renewal parts by data system. TP. May 1967. p95.
underfrequency operation of large units. E. G. Noyes and J. W. Skooglund. May 1967. p73–6.

U

Ultrasonic energy, vapor degreaser. PI. May 1967. p96.

W

Warehousing
automatic storage system serves large parts warehouse. TP. Sept 1967. p159.
semiautomatic system. Sept 1967. Back cover.
Water purification
semipermeable membrane process. July 1967. Inside front cover.
See also Flash evaporator.
Welding
industrial ac-dc arc welder. PI. Jan 1967. p32.
solid-state welders facilitate fabrication of giant drill rigs. TP. Sept 1967. p158.
Wire, continuous casting and rolling process makes rod for wire drawing. R. E. Fromson and D. R. James. May 1967. p77–81.
